

JAYESH PHADKAR

Product Design & Development Engineer | CAD, DFM & Manufacturing NPI

jayeshphadkar27@gmail.com | +1 (650) 439-6009 | Los Angeles, CA | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Product design and development engineer with 6+ years spanning CAD design, DFM, tooling/fixture design, prototype build and validation, and BOM/ECO management, with added experience bridging R&D/hardware and overseas manufacturing partners on connected electronics programs. Proven record taking tooling, assemblies, and hardware from concept through mass production evaluating manufacturing/ODM capabilities and closing design and quality issues pre-release while directing engineering and supplier teams across the US, India, and China.

PROFESSIONAL EXPERIENCE

Technical Product Manager | Hyundai Technology — Anaheim, CA

Dec 2025 – Present

- Define product requirements and technical specifications for digital photo frames, Android tablets, monitors, and a Wi-Fi/Bluetooth smart speaker, balancing user experience, target cost, quality, and manufacturability.
- Serve as a technical bridge between R&D and manufacturing/ODM partners, evaluating hardware architecture, ODM/system-integrator capabilities, and certification costs to guide manufacturing strategy.
- Review prototypes, mechanical/industrial design, and firmware and software builds to close design, fit, and quality issues ahead of release across 3 consumer electronics programs.
- Direct India- and China-based engineering, manufacturing, and supplier teams across time zones, tracking milestones and risk to protect launch schedules and cost targets.

Project Manager, Product Development & Supply Chain | Kavruk Technologies — Remote

Jan 2023 – Dec 2024

- Standardized BOM, ECO/ECN, and engineering-drawing management in SolidWorks, Creo, PLM, and ERP, improving configuration accuracy and cutting rework from out-of-sync documentation.
- Directed cross-functional build schedules and material readiness for automation-system assemblies, aligning design, manufacturing, and procurement around NPI build milestones.
- Partnered with vendors and purchasing teams on lead-time reviews, PO/shortage tracking, and design-supplier conflict resolution, protecting clear-to-build visibility and cost exposure.

Manufacturing & Operations Engineer | Mahindra Farm Machinery — Pune, India

Apr 2020 – Dec 2022

- Designed custom tooling and fixtures for powertrain assembly in SolidWorks/CAD, cutting production cycle time by 50%.
- Directed material readiness for Mahindra's \$1.8M, 88-hp Paddy Harvester 2100 program, coordinating 25+ suppliers to protect on-time component delivery and production schedules.
- Used vendor evaluation, cost analysis, and make-vs-buy data to guide sourcing decisions, reducing lead-time variability by 27% and lowering program cost risk through local sourcing and supplier planning.

Systems Engineering Intern | Automotive Research Association of India — Pune, India

Dec 2019 – Feb 2020

- Supported powertrain and emissions testing, coordinating component and test-equipment availability and vendor logistics across multiple OEM platforms.

EDUCATION

Master of Science in Engineering Management — California State University, East Bay | Aug 2023 – May 2025

Bachelor of Science in Mechanical/Automobile Engineering — Pune University | Jun 2016 – May 2020

CORE SKILLS

Mechanical Design & CAD: SolidWorks (CSWP), NX CAD, Creo, CATIA, AutoCAD, tooling & fixture design, weldments/sheet-metal component design

Manufacturing & DFM: Design for Manufacturing (DFM), machining/fabrication oversight, BOM management, ECO/ECN, PLM, ERP/MRP, supplier & vendor management across US/India/China

Hardware & R&D Bridge: Hardware architecture evaluation, ODM/system-integrator coordination, firmware/software build review, certification & compliance cost analysis

Simulation & Validation: ANSYS, Fluent, Icepak (thermal simulation), prototype build & validation, root-cause analysis, Minitab

Program & Product Leadership: Cross-functional & global team leadership, product requirements & specs, Lean Six Sigma Green Belt, Agile/Scrum, Microsoft Project

Certifications: Lean Six Sigma Green Belt, CSWP (Certified SolidWorks Professional), Data Analysis & Visualization with Power BI, Supply Chain Software & Tools – Unilever
